KHALED ALKHATIB
FRONT END WEB DEVELOPER

Summary

A creative and motivated front end web developer with a background in dentistry and mentoring new dentistry graduates. Strong leadership and communication skills with an aptitude for learning new technologies. Excels in providing impactful technical solutions within collaborative teams. Programming and tweaking codes to see the outcome has always been a major interest of mine.
As I was working on becoming an accredited dentist in Canada, I found myself going to back to doing simple web development projects and getting more curious on how things work.
After thorough consideration and knowing that web development is a major field of interest before I started my journey in dentistry, I decided to do a career shift and focus full-time on the world of programming. I am eager to pursue my passion in this field and looking forward to collaborate with teams.

Projects

The Shoebox
An E-Commerce website for selling Shoes.
The app is deployed using Heroku and Netlify. To check the code and the readme, please visit https://github.com/Khaled91Alkhatib/final-project-client-side
